DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement filed June 06, 2000 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each U.S. and foreign patent; each publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

Election/Restrictions

2. Claims 1-10 and 14-28 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to the nonelected groups Ia, II, III and IV, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 5.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 11-13 are rejected under 35 U.S.C. 102(e) as being anticipated by Yang et al. (US 6,005,620).

Regarding claim 11, Yang discloses a system (12) comprising: a processor (82, 42); storage (86, 42) coupled to the processor; a video controller (RTE 52) coupled to the processor; a packetization device (72, 52) coupled to the video controller which independently packetizes (each video source 32 is packetized separately by its associated packetization device 72, 52) at least two video streams (see FIG. 1-4; col. 3, lines 60-62; col. 4, lines 23-31).

Regarding claim 12, Yang shows a modulation device (52) to modulate and transport the independently packetized streams (see FIG. 1-4; col. 3, lines 4-7).

Regarding claim 13, Yang teaches each RTE 52 controls each frame rate of the video stream independently (see FIG. 4; see col. 4, lines 59-65) and packetizes the stream to be de-packetized at the original frame rate in a display device (via decoder 22 – see FIG. 1).

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Stanger et al. (US 6,084,910) teaches an apparatus for statistically multiplexing a plurality of video signals. Sanami (US 6,014,368) teaches a packet multiplexing system which detects multiplexing errors, including packetizing modules that packetize elementary streams to produce packetized elementary streams, and a TS/PS packetizing module to produce transport streams or program streams.
